

ENVIRONMENTAL POLICY

Truflo Marine Ltd recognises the need to develop and maintain a continuously improving system for controlling Environmental Performance.

We believe that our business can, by adopting sound Environmental Practices protect and improve the environment.

To this end the company strives to:

-  Minimise the effects of our activities on the Environment by planning with objectives and targets. This will be reviewed annually during the management meeting.
-  To conform to and to exceed where relevant all applicable Environmental Laws and Regulations and other requirements whilst working towards meeting the Requirements of ISO 14001.
-  Take all reasonably practicable measures to prevent pollution to the general Environment by implementing appropriate controls, training and regular audits.
-  Ensure the provision of training for all employees to compliment their performance in respect to our Environmental Management Systems.
-  Reduce or eliminate waste throughout our practices and activities.
-  Apply the most appropriate Environmental Standards, making full use of the best available techniques not entailing excessive costs and regularly reviewing those standards.
-  Make sure that employees, contractors, visitors etc. are aware has implemented and Environmental Management System.
-  The EMS is a programme of continuous improvement and all employees have their part to play in it.

This policy covers all the activities associated with the operations of the company.

Responsibilities for delivering best practice Environmental options that meet the needs of our stake holders lies with the Managing Director.

Clayton Manley
Managing Director
